San Diego's job growth has outperformed the U.S. since the recession, and the county has become one of the nation's top life science nodes. San Diego is also a worldwide tourist destination, and those tourists pour billions of dollars into the local economy. Median household incomes are still rising faster than the rate of inflation, which also boosts local buying power.

San Diego's retail sector has picked up in the past year, and 2019 is on pace to end the year with positive net absorption. That is a change from 2018, when three of the four quarters recorded negative absorption. Occupancies remain high and are forecast as an improvement over the long-term average, and annual rent growth remained above the long-term average following 19Q3. Every retail sector posted positive annual and quarterly rent growth through 19Q3.

At the same time, under-construction inventory entering 19Q4 totaled less than 400,000 SF. More than a third of that under-construction inventory was the redevelopment at the Collection at UTC. The demolition of the former Sears at the Westfield UTC site dented supply and set up 2019 to add its lowest level of net new supply since 2011.

Among all asset classes, retail sales have proven to be the steadiest over the past few years. Transaction volume is pretty consistent, and in 2019, that trend continues. In fact, San Diego recorded one of the largest suburban retail sales in years in 19Q2, the \$150 million deal for Clairemont Town Square as investors have increasingly targeted suburban shopping centers.

Not Absorption

The occupancy rate in San Diego remains near all-time highs, while the availability rate reached a post-recession low at the end of 19Q3. That comes as San Diego is on pace to end 2019 with positive net absorption, a turnaround from 2018 when the year ended with negative absorption for the first time since 2015.

The two largest new leases this year were signed in 19Q2. Go Green Plant Nursery committed to 160,000 SF in San Marcos. The property had been available for sale prior to the commitment. At Home signed a deal for more than 100,000 SF at Carmel Mountain Plaza and moved in during 19Q3. The anchor space was formerly occupied by Sears.

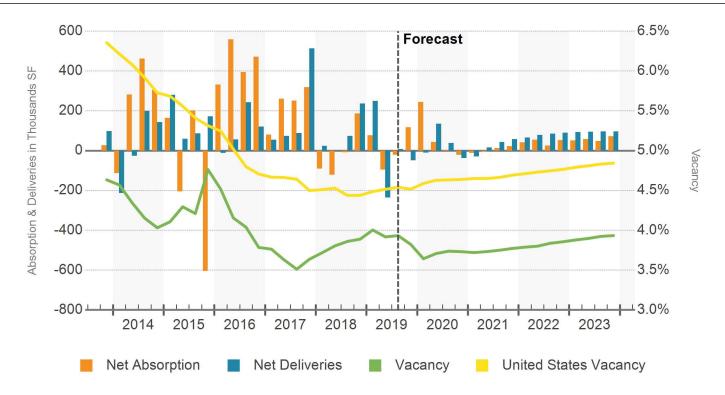

Fitness tenants continue to take down space. CoStar has tracked 400,000 SF of commitments for gym space since last year, with several big move-ins in 2019: EoS Fitness moved into almost 50,000 SF at Palm Tree Plaza in Oceanside, FIT Athletic occupied a similar size in Mission Beach, and 24 Hour Fitness moved into 30,000

SF at Penasquitos Village. LA Fitness also committed to 37,000 SF at the Stylus & Siena apartment development at Civita in Mission Valley.

Like most metros, store closures have impacted San Diego. At Parkway Plaza in El Cajon. Burlington (42,000 SF), Extra Space Storage (71,000 SF), Bob's Discount (32,000 SF), and Ashley Furniture (35,000 SF) backfilled the former Sears space during 19Q2 and 19Q3. At Macy's in Mission Valley, the space is being broken up to accommodate tenants from 24 Hour Fitness to Bed Bath & Beyond. Kohl's, in El Cajon, has even taken to splitting off some of its space to offer for lease.

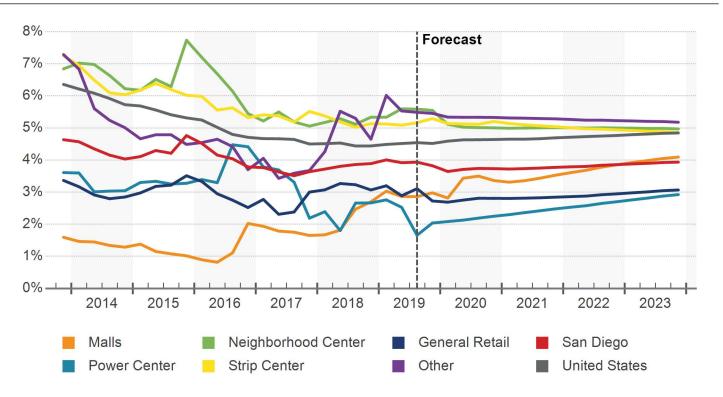

Burlington also took down a former Toys "R" Us in National City in 2019 and another in Oceanside, while Hobby Lobby moved into a former 50,000-SF Babies "R" Us in Mira Mesa in 19Q3. Others from Aldi to Dollar Tree have moved into other big box vacancies across the county from Chula Vista to East County Square in El Cajon.

<sup>\*</sup>Renewal

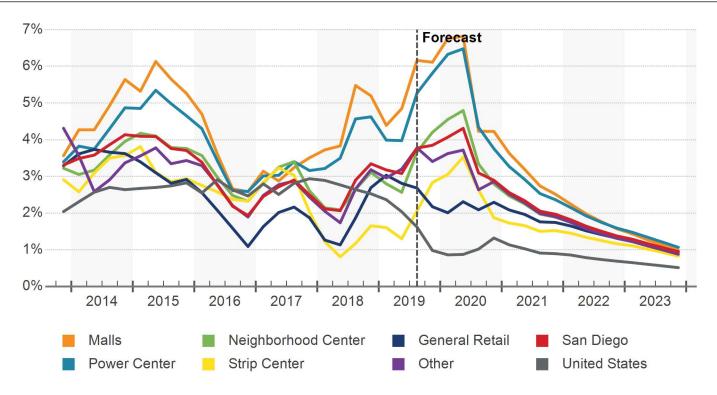

With high occupancies, and positive absorption in three of the past four quarters, retail landlords have enjoyed a run of healthy rent growth. Annual growth was still above the long-term average following 19Q3, where it is forecast to remain into 2021 before slowing further.

Every sector continues to post positive rents, and in fact, rents have now grown for 33 straight quarters through 19Q3, the longest run of commercial properties in San Diego. Both industrial and office properties have posted gains for 31 straight quarters. Mall space, in particular, has helped sustain strong growth, as a number of malls

have repositioned their space, providing an experiential element, and boosting rents in the process.

Areas of the county where high-income households are most prevalent pace the market in terms of rent growth. From Mission Valley and Rancho Bernardo to UTC and Carlsbad, rent growth is performing best where buying power is strongest. Submarkets with higher unemployment rates and softer demographics posted lower annual rent growth at the end of 19Q3, such as Imperial Beach, Lakeside, and National City.

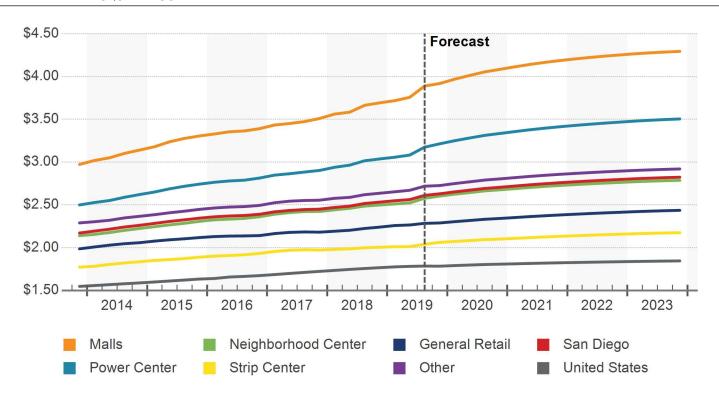

# **MARKET RENT GROWTH (YOY)**

# MARKET RENT PER SQUARE FOOT

At the conclusion of 19Q3, less than 400,000 SF was under construction. A plurality of that total was at The Collection at UTC. The percentage of inventory under construction was less than 0.5%. It continued the trend of relatively muted levels of under-construction inventory relative to history.

A number of proposals fill the pipeline, including retail at Civita and several coastal retail destinations. However, most of those have yet to break ground and remain in various stages of planning.

Developers, instead, have turned to renovations to match the needs of locals in an environment increasingly challenged by e-commerce, which accounts for about 10% of retail sales. That is one reason that inventory growth has reached 0.5% only once this cycle, and that was only after an expansion at Westfield UTC in 2017 that added 400,000 SF to the existing mall.

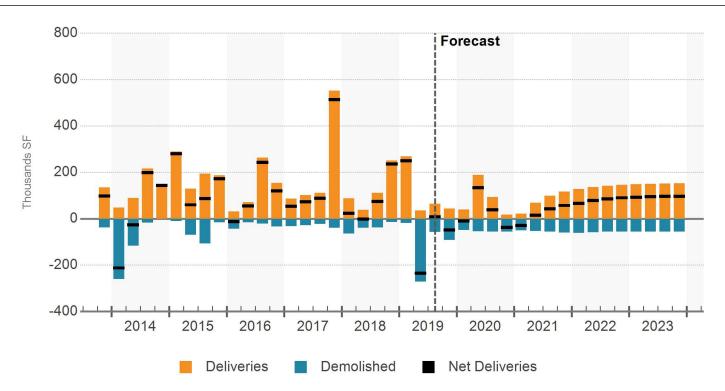

After the balance of Westfield UTC was expanded in

2017, the former Sears space is being improved to provide further shopping, lifestyle, and dining elements called The Collection at UTC. That redevelopment broke ground in 2019 and has 30,000-SF commitments from coworking brand Industrious and Equinox. The demolition of the former Sears chipped away at net supply in the first half of 2019.

Work has begun at the Costa Verde shopping center across from Westfield UTC. Regency is renovating the center in time for the completion of the new trolley line and the Genesee trolley station.

Kilroy's One Paseo project is actively under construction, with the 95,000-SF retail portion and more than 600 apartments having delivered in 2019. After that, an office portion totaling 300,000 SF will deliver. Kilroy is competing for tenants with Del Mar Highlands Town Center, which invested more than \$100 million in renovating and expanding its footprint, named Collection at Del Mar Highlands.

Both local and institutional money are active here, and most money comes from within California. Overall investment has remained steady over the past few years, as the other property sectors have endured more pronounced highs and lows. Market cap rates are holding at 5.7%, a shade lower than office cap rates. In 2019, about 25% of investment has originated from institutional, private equity, or REIT concerns while those concerns represented 30% on the seller's side. Suburban shopping centers anchored by a gym or grocery store were particularly hot in 2019.

In Carlsbad, investment firm Asana Partners purchased the Beacon La Costa in August 2019 for \$58 million. It is anchored by an Equinox fitness chain. Less than five years earlier, an investment group including Linwood Ventures and Angelo, Gordon & Co. purchased the shopping center for \$31.6 million. The entire center had since been renovated.

In one of the largest suburban retail sales in years, Merlone Geier Management purchased the Clairemont Town Square from the State Teachers Retirement System of Ohio for \$150 million in May 2019. Tenants include Vons, countless national retailers, and several restaurants.

That is one of several deals highlighting the strength within the grocery-anchored sector. In March 2019, Vista Village sold for \$66.2 million. The retail center received offers from more than 300 bidders. A Las Vegas investor, CFT Vista LLC, acquired the property at a 6.4% cap rate. Grocer Frazier Farms, luxury movie chain Cinepolis, and Crunch Fitness are among the most prominent tenants.

San Diego's economy is doing well by most measures. More than 80 research institutes are located in San Diego, from Scripps Research Institute to Salk Institute for Biological Studies, in addition to five universities. This cluster of research in the Golden Triangle has created one of the strongest life science cores in the United States.

San Diego is also home to more than 143,000 active duty and civilian military employees. And the defense industry accounts for 22% of jobs in San Diego. The military ecosystem provides economic benefits to the region unmatched by any other sector and supports cutting edge innovation. It also contributes about 20% to the gross regional product.

It is also why San Diego has one of the largest concentrations of millennials in the country, accounting for 27% of the population.

In the past 12 months, San Diego added 30,200 net nonfarm jobs. That is an increase of 2.0% since last October. Employment grew by 7,100 in Professional and Business Services, one of the largest sector gains in the past year. More specifically, 5,400 jobs were added in the Professional, Scientific, & Technical Services sector. Trade, Transportation and Utilities recorded the largest year-over-year drop, shedding 2,200 jobs. That brought the unemployment rate up to 2.8% in October, largely in line with September's 2.7% rate.

Although the office market is performing well, a number

of residents are falling behind. The cost of living and lack of affordable housing in San Diego has led to slowing population growth. It is now almost half the rate of what it was earlier this cycle. Data indicates that residents are moving to more cost-friendly areas, including Inland Empire, Phoenix, Las Vegas and Texas.

The tech economy in San Diego contributes almost \$30 billion annually to the local economy, which is almost 15% of San Diego's GDP, and employs 140,000 people according to the San Diego Regional Economic Development Corp. Those jobs pay an average of \$132,000 compared with an average of \$63,000 for jobs in the rest of the economy. Furthermore, Scripps Health has five campuses across the metro and announced that it is spending \$2.6 billion on upgrades to its facilities, further bolstering San Diego as a destination for "medical tourism." The port, as well, supports more than 40,000 jobs in San Diego and drives more than \$8 billion in economic activity.

Major San Diego defense contractors are one of the metro's economic pillars. In fact, Northrop Grumman has designated San Diego as one of its five "centers of excellence," focusing on unmanned systems. The metro should be able to avoid major defense cuts because it specializes in the future of military spending: unmanned drones and cybersecurity. And the Navy's renewed focus on the Pacific theater of operation will result in a 60/40 split between the Pacific and Atlantic fleets, further solidifying San Diego's status as a major Navy hub.
